Tentative Budget

Presented to the Board of Education March 24, 2022

Overview

1

Budget Priorities and Goals 2

Tax Levy Limit 3

Tentative Budget Estimates

BUDGET PRIORITIES & GOALS

Budget Priorities

- 1. Fiscal Stability and Sustainability
- 2. Maintain & Expand Core Programs
- 3. Assess Staff & Student Needs and Wants
- 4. Health and Safety of Students and Faculty
- 5. Safe, Open, & Attractive Facilities

2022-23 Budget Goals

- 1. Creating well-rounded students by maintaining and expanding existing core programs
- 2. Building programs around staff and student wants and needs to provide individual student success each academic year.
- 3. Create safe, open, attractive facilities for staff, students, and the community

TAX LEVY & TAXES

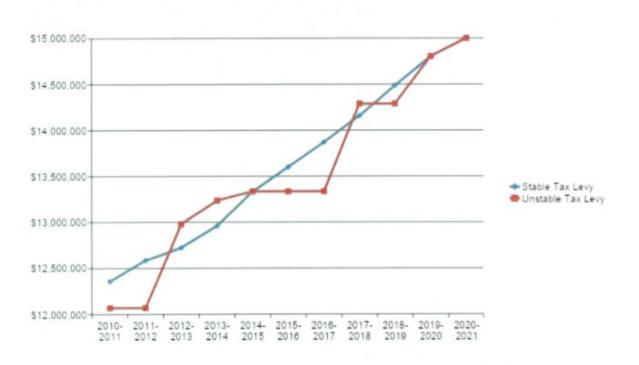

A TAX LEVY IS:

The total amount of property taxes a school district must collect to balance its budget, after accounting for all other revenue sources including state aid.

The tax levy is the **basis** for determining the <u>tax rate</u> for each of the cities, towns or villages that make up a school district. Tax Levy increases does not necessarily equal tax rate increases. Exemptions, evaluations, and equalization affects the tax rate.

Managing the Tax Levy

A history of low taxes catches up to Johnstown

District points to history of small levy increases as forging budget crisis

Zachary Matson @zacharydmatson | June 8, 2019

Residents arrive to vote at Johnstown High School on May 21

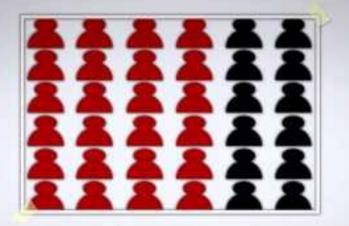

THOTOGRAPHER: ERICA MILLER

"While it may be politically appealing, limited levy growth can compound over time and force districts into budget crisis once they are hit with unexpected cost increases or other challenges" - Michael Borges, ASBO

"It is prudent to have steady increases in your levy each year. That way, when you face a financial bump in the road down the line, you have the resources to address it and not resort to catastrophic cuts to programs." - Michael Borges, ASBO

TAX LEVY LIMIT (TAX CAP)

If the proposed tax levy is more than its limit, that district will need a super majority to approve its budget.

The Tax Levy Limit is:

A calculated tax levy amount (according to a state formula) that is the highest allowable amount (before exclusions) that a school district can propose for which only the approval of a simple majority of voters (50 percent plus one) is required.

Despite its name, it does not set a limit on the tax levy that a school district (or municipality) can propose.

Does the tax cap law mean school tax levies can't increase by more than 2 percent?

No, the law does not prohibit tax levy increases greater than 2 percent.

Despite how it's been described by some politicians and the media, the legislation signed into law in June 2011 requires each district to calculate its own tax levy limit. Two percent (or the rate of inflation, if less) is just one of eight factors in this calculation. The law also establishes a higher threshold of voter approval for a budget to pass if a district's proposed tax levy increase (before exclusions outlined in the law) exceeds its individual tax levy limit.

What is a tax levy limit?

For school districts, the tax levy limit is the highest allowable tax levy (before exclusions) that a school district can propose as part of its annual budget for which only the approval of a simple majority of voters (more than 50 percent) is required.

Any proposed tax levy amount above this limit will require budget approval by a supermajority (60 percent or more) of voters.

Essentially, the tax levy limit sets a threshold requiring districts to obtain a higher level of community support for a proposed tax levy above a certain amount.

However, the 2011 legislation does not place a limit on any taxes a school district would levy to pay for expenditures related to specific "exempt" items, including some court orders, some pension costs and local capital expenditures. These items are then added to the tax levy limit to arrive at the maximum "allowable" tax levy limit.

How is the tax levy limit determined for school districts?

The law dictates an eight-step formula that each school district must use to calculate its individual tax levy limit.

In particular, the calculation adjusts a district's tax levy to reflect growth in the local tax base (if any) and the rate of inflation or 2 percent (whichever is lower).

What will the property tax cap law mean for MY tax bill?

It's important to remember that the tax cap law only determines how much voter support is needed to pass a budget. It does not impose a universal 2 percent cap—or any other specific amount—on taxes.

It applies to the tax levy, not to tax rates or individual bills. Keep in mind, there are several factors that dictate how an individual's school tax bill is calculated after a school district sets the final tax levy—including changes in property values and equalization rates—none of which are within the district's control. This calculation process did not change under New York's property tax cap law.

What will the property tax cap law mean for MY tax bill?

Tax bills continue to be calculated by using a property's assessed value (as determined by the local town assessor) and the tax rate—or the amount paid in taxes per \$1,000 of assessed value. Tax rates are not solely determined by the tax levy approved by voters; they are often adjusted by the state using equalization rates, designed to equally distribute the tax burden across municipalities within a district.

Tax bills can also be affected by STAR or other exclusions for which individual taxpayers may qualify.
